

Summer Practice for Rising First Graders

Studies show that students can lose up to 34 % of the curriculum learned throughout the school year during the summer. As a result, we have enclosed in this packet some activities that will help your child continue to develop math and reading skills.

The **reading** chart has 20 book evaluations for your child to complete. If you would like your child to do additional reading activities, please feel free to copy the reading paper. Children should bring their reading charts to their first-grade teachers!

We are sending home workbooks to help review sounds and sight words. There is *no expectation* that students will complete this book! They are extras we have in stock that we wanted to share them with you. We have not covered cursive handwriting, so please do not have your child work on that.

For math practice, please use the link to IXL below. This will take you and your child to practice that will be very beneficial to prepare your child for first grade. The skills have been marked with a star for your convenience, and first grade teachers will receive the data from the students' practice.

Thank you for your support this year. Have a wonderful, relaxing summer. We look forward to seeing everyone in the fall.

The Kindergarten Team
